

Revised: Thursday, December 17, 2009

Dear Valued Larsen Customers,

This letter is to keep you informed on the current status of AB-1953(California No Lead Legislation), and your Larsen inventory that could possibly be affected by the law. All salesmen will be required to meet with their customers and explain our policies and procedures for dealing with affected inventory. Any customer not being serviced by a Larsen salesman can contact our California area manager (Dan Pacho) or me directly for the details of your account. The Larsen Supply team is dedicated to our customers business and we will be working with you to insure your compliancy. Larsen Supply now has a link on our web site <http://www.lasco.net>, containing up to date no lead product information. This information is online changes weekly. It will have an up to date available no lead Larsen product listing, information regarding the law and other items available to help your store to become compliant. Larsen Supply has ordered the product for the faucet repair category and we expect some stem inventory in late December and the balance of No Lead faucet repair inventory in late January. Because of the industry wide last minute changes in this category, much of the product may not be available until late December or even into January. All highlighted categories are in stock and shipping compliant product for most or all of the SKU's contained within the category. If you have questions regarding a specific category or SKU, please contact myself or a team member, or check the web site for information.
