RE:

PAGES: 1 - including cover

Customers asking if you are going to be making a lead free version for the GP77005-RP and the GP77006-RP Valve stems, Please advise..part number and list pricing..

(Calif)

Thanks Steve *(checked with Tech -*

*If the valve is lead free, placing it in a leaded faucet will do nothing, however, placing it in a lead free faucet will maintain its lead free status.*

*So the answer is that service parts are exempt from the Ca. lead free standard.*

*Bette*
